Education

2019-2023

BS Computer Science

University of Gujrat sub-campus Mandi Bahauddin

2016-2018

FSc. Pre-Engineering

Govt. Graduate college Mandi Bahauddin

Expertise

- Team work
- Problem solver
- UI/UX

Experience

○ 2020 - 2023

Web Development

Started journey of web development in 2018 from front-end to backend development, but spend more time on front-end to get better and better first. I have created web designs using HTML, CSS, JavaScript and also work with frameworks like Bootstraps for better responsive websites. For the backend development I worked with the language PHP to make things dynamic. Also used SQL database for to manage forms like contact forms. I have developed PhotoApp website which is uploaded on GitHub.

○ 2021 - 2023

Android Development

I have extensive hands-on experience in Android app development using Android Studio, Java, and XML. I have created mobile applications that are both user-friendly and feature-rich. By integrating Firebase as a real-time database and backend solution, I have successfully completed projects that leverage Firebase's capabilities for data storage, authentication, and real-time synchronization, thereby enhancing app functionality and increasing user engagement. I have developed application named as Health File to store medical records of patients like medical reports. All data of this application is managed on firebase and secured.

○ 2022-2023

Flutter Development

Flutter is rising technically that's why I added flutter in my development journey. From 2022 I have started learning flutter from YouTube and created UI designed using dart language. I have created some projects like BMI calculator and used firebase for creating projects like todo app. To created eye-catching design I have created some custom widgets like buttons. I really enjoying it and trying to learn more with different experiences.

Skills

Languages

- HTML
- CSS
- JavaScript
- PHP
- SQLite
- Java
- XML
- Dart

Frameworks

- Bootstrap
- Flutter
